

ALMAS HOSSEN

Python Backend Developer & AI Integrator

Bangladesh | WhatsApp:+880 133 143 8063 [Email](#) [GitHub](#) [LinkedIn](#) [Portfolio](#)

PROFESSIONAL SUMMARY

Python Backend Developer & AI Integrator experienced in building REST APIs, scalable backend systems, and AI-powered applications with **FastAPI**, **Django REST Framework**, **PostgreSQL**, and **SQLAlchemy**. Skilled in **Redis**, **Celery**, **Docker**, **CI/CD**, **JWT/RBAC**, **RAG**, **embeddings**, **LLM integration**, and **AI tool calling**.

TECHNICAL SKILLS

Languages & Frameworks: Python, FastAPI, Django, DRF, Asyncio, SQLAlchemy, Pydantic

Databases: PostgreSQL, Redis, SQLite, Alembic, SQL Optimization

Backend: REST APIs, Microservices, JWT, RBAC, Rate Limiting, Background Tasks

DevOps & Testing: Docker, Docker Compose, Git, GitHub Actions, CI/CD, Nginx, Pytest, Celery

AI & LLM: Gemini API, LLM Integration, Function/Tool Calling, RAG, Embeddings, Vector Search, AI Automation

FEATURED PROJECTS

1. AI Customer Support Agent

FastAPI • PostgreSQL • SQLAlchemy • Gemini • Tool Calling

Built an AI support agent that handles customer, payment, invoice, and ticket queries using LLM tool calling.

GitHub: <https://github.com/Almas-Web/ai-customer-support-agent>

2. AI Support Assistant

FastAPI • PostgreSQL • SQLAlchemy • Gemini • Function Calling

Developed an AI customer support and billing assistant with LLM-powered backend operations.

GitHub: <https://github.com/Almas-Web/ai-support-assistant>

3. AI Document Q&A API

FastAPI • RAG • Embeddings • Vector Search • LLM

Built a RAG API for document processing and semantic question answering using chunking, embeddings, and vector search.

GitHub: <https://github.com/Almas-Web/ai-document-qa-api>

4. AI Email Analyzer API

FastAPI • PostgreSQL • SQLAlchemy • Gemini • Docker

Built an AI-powered email analysis API with structured processing, Gemini integration, and PostgreSQL persistence.

GitHub: <https://github.com/Almas-Web/ai-email-analyzer-api>

5. CommerceHub — E-Commerce REST API

Django DRF • PostgreSQL • Redis • Celery • Pytest • Docker

Built an e-commerce API with Customer/Seller/Admin roles, JWT permissions, Redis caching, Celery, and **187 tests with 97% coverage**.

GitHub: <https://github.com/Almas-Web/commercehub-api> |

6. SupportFlow — Multi-Tenant Support & SLA Platform

Django DRF • PostgreSQL • Redis • Celery • Docker • Nginx

Built a multi-tenant support platform with RBAC, ticket assignment, SLA deadlines, escalation, notifications, audit logs, and analytics.

GitHub: <https://github.com/Almas-Web/SupportFlow>

7. SaaS Billing API

FastAPI • PostgreSQL • SQLAlchemy • Alembic • Docker

Developed APIs for subscriptions, projects, payments, billing, and usage management using PostgreSQL and SQLAlchemy.

GitHub: <https://github.com/Almas-Web/saas-billing-api> | **Docs:** <https://saas-billing-api-9p36.onrender.com/api/docs/>

8. TeamFlow API — Task & Team Collaboration

FastAPI • SQLAlchemy • PostgreSQL • Redis • Celery • Docker

Built a workspace/task management API with Redis/Celery background jobs and Prometheus/Grafana monitoring.

GitHub: <https://github.com/Almas-Web/teamflow-api>
